Who pays for the advertising of merchants and other business? Not the advertiser, for the cost is returned to him four fold in increased profits. Not the purchaser, for he buys cheaper, from the advertiser and has a better assortment and fresher goods to select from. Who then, really pays for the advertising bills? The non-advertiser of course. A just proportion of the money he loses by his lack of initiative or enterprise finds its way to the printer, to advance the cause of education and the interests of the community. If you have never looked at it in that light, it is worth thinking about. If \$10 worth of advertising would bring \$20 additional profits, you would have your ad vertising free and be \$10 ahead of the game besides. The non-advertiser who lost the trade and profits which you two parcels remain ussold, as folgained would then be bearing your lows: advertising expense as well as adding to your profits.
